

Nitin Khare

Software Development Engineer | Full Stack

nitin.khare.03.13.2001@gmail.com | +91-7355079179 | LinkedIn | Portfolio | GitHub

PROFILE

Full Stack Software Engineer with **2.6+ years of experience building scalable web applications and real-time systems using React.js, TypeScript, JavaScript, Node.js, Express, and MongoDB**. Experienced in designing production-grade REST APIs, microservices, payment integrations, and real-time communication systems using WebSockets and Firebase Cloud Messaging. Proven ability to collaborate with cross-functional teams to deliver high-performance, secure, and scalable products for global users.

PROFESSIONAL EXPERIENCE

PragatX Softwares, Software Development Engineer II 11/2025 – Present | Ahmedabad

- Design and implement **modular frontend architectures and reusable component systems**, translating Figma designs into responsive and maintainable UI.
- Develop and maintain **Express.js microservices and REST APIs**, integrating external APIs and third-party services to support product functionality.
- Implement **real-time event-driven communication workflows** using WebSockets and cloud messaging systems.
- Integrate **secure payment processing, push notification systems, and third-party services** into production applications.
- Collaborate with **product managers, designers, and backend engineers** to deliver scalable, high-performance product features.

Naag Foundation Trust, Web Developer 11/2024 – 10/2025 | Remote

- Built and maintained a responsive **MERN stack web platform** to support NGO digital initiatives and event management.
- Developed **RESTful APIs and interactive UI modules** improving data flow between frontend and backend services.
- Implemented new features including **event listing modules, donation workflows, and contact systems**.
- Optimized frontend accessibility and performance to improve user engagement.

PROJECTS

Familiya Connect (famNme), 02/2026 – Present

Travel & Astrology Platform | React.js, TypeScript, Express.js Microservices, Firebase

- Developed a **TypeScript-based Express.js microservice** responsible for travel journey management and astrology prediction services.
- Designed and implemented REST APIs for travel workflows including **journey listings, itinerary details, summaries, and booking request handling**.
- Integrated **third-party astrology APIs** to provide daily, monthly, and yearly horoscope predictions based on zodiac and nakshatra data.
- Implemented backend services for **personalized astrology predictions using user birth details**, enabling customized prediction generation.
- Built and integrated a **Firebase Cloud Messaging notification system**, enabling real-time push notifications and in-app alerts.
- Implemented frontend integration for **FCM token management, push notification delivery, and background message handling using service workers**.
- Developed reusable **React + TypeScript UI modules** to support seamless interaction with backend microservices.

Wah Smart Deals, US-based Retail Deals & Digital Coupon Marketplace | React.js, 11/2025 – 01/2026
WebSockets, Stripe, FastAPI

- Developed the **frontend architecture of a community-driven retail deals platform** enabling local US vendors (restaurants, home services, retail businesses) to publish promotional offers and manage digital coupon campaigns.
- Translated **Figma product designs into responsive React.js interfaces**, building reusable UI components and improving frontend maintainability.
- Integrated **REST APIs built with Python FastAPI**, enabling dynamic deal listings, coupon generation, vendor onboarding, and deal redemption workflows.
- Implemented **WebSocket-based real-time updates** to support instant coupon validation when vendors scan customer coupons during redemption.
- Integrated **Stripe payment gateway and webhook event handling** to manage secure payment processing and asynchronous transaction updates.
- Managed **production deployment of the React.js frontend on AWS EC2**, configuring build artifacts and server environments to ensure reliable application delivery.
- Collaborated with **backend engineers and product teams** to deliver scalable frontend features for vendor and customer workflows.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML, CSS

Frontend: React.js, Next.js

Backend: Node.js, Express.js, REST APIs, Microservices

Real-time Systems: WebSockets, Socket.io, Firebase Cloud Messaging

Database: MongoDB, PostgreSQL

Cloud & Tools: AWS S3, AWS EC2 Stripe API, Git, Postman

Other: JWT Authentication, API Security, Payment Integration, KeyCloak

EDUCATION

Bachelor of Technology, Meerut Institute of Engineering and Technology 07/2019 – 08/2023 | Meerut

CERTIFICATES

MERN Stack Development

— PW Skills
